

AIML graduate with hands-on experience building machine learning models, GenAI applications, and data-driven workflows. Skilled in Python, SQL, R, NLP, and computer vision, with multiple deployed projects using Flask, FastAPI, and Gradio. Experienced in developing explainable ML pipelines, integrating LLM-based solutions, and optimizing end-to-end performance across real-world applications. Strong foundation in data preprocessing, feature engineering, and deploying AI systems on cloud platforms.

SKILLS

Programming	Python , SQL, C, JavaScript
Databases	MySQL, PostgreSQL, Supabase
Backend Development	Flask, FastAPI, REST APIs, Postman
Machine Learning Frameworks	Scikit-Learn, XGBoost, LightGBM, Random Forest, Decision Trees, SVM, KNN
Deep Learning Frameworks	TensorFlow, Keras, PyTorch, Neural Network, CNN, RNN
Natural Language Processing	NLTK, SpaCy, Gensim
Computer Vision	OpenCV, YOLO, OCR, Detectron, Mediapipe
Developer Tools	VS Code, Jupyter Notebook, Spyder, PyCharm, Anaconda, Git, GitHub, Docker
Data Visualization Tools	PowerBI, Tableau

PROJECTS

AI Recipe Creator (LLM-based Generation)	Live Demo	Nov 2025
<i>Tech Stack:</i> Python, Flask, Google Gemini AI, RAG, JavaScript		
- Engineered an LLM-driven recipe generator using Gemini AI and RAG with 90% accurate image-to-text extraction. - Improved recipe relevance by 30% through multimodal analysis and refined prompting. - Optimized inference pipeline to achieve <500ms latency after deployment on Render.		
Sentiment Analysis Web App	Live Demo	July 2025
<i>Tech Stack:</i> Python, Scikit-learn, Flask, Gradio, Hugging Face Spaces		
- Trained a Naive Bayes classifier on Sentiment140 achieving 82% accuracy using TF-IDF features. - Designed the initial Flask interface and later migrated to Gradio, reducing deployment issues by 60%. - Delivered <300ms prediction latency with consistent inference on Hugging Face Spaces.		
Saffron Delight – AI Food Ordering System	Live Demo	Sep 2024
<i>Tech Stack:</i> Python, FastAPI, Dialogflow, Supabase, Vercel		
- Built an AI food ordering chatbot using Dialogflow with 90% intent accuracy. - Enabled multi-item order handling and bill calculation, reducing manual steps by 60%. - Implemented order tracking and data persistence using Supabase with 99% retrieval success.		

EDUCATION

Bachelor of Technology in Artificial Intelligence & Machine Learning , R. C. Patel Institute of Technology	July 2025
CGPA: 7.08	
Higher Secondary Certificate (HSC) – Science , D. R. Junior College	June 2021
Percentage: 83.83%	
Secondary School Certificate (SSC) , S. H. G. S. High School	June 2019
Percentage: 81.81%	

CERTIFICATIONS

Full Stack Data Science & Generative AI with Agentic AI , Naresh IT, Hyderabad	Dec 2025
Machine Learning Engineer Training (2 Months) , Symbiosis Skills & Professional University, Pune	Aug 2024
AWS Academy Graduate Certificate – Cloud Foundations , AWS Academy	Aug 2023

PUBLICATIONS

Breast Cancer Detection using Machine Learning and Deep Learning Models , IJCRT	May 2025
Published research on ML DL techniques for breast cancer diagnosis using classical and deep models.	
Link: IJCRT25A5502	

ACTIVITIES

- Technical Team Member at the Fetch.ai Club, contributing to AI/ML workshops and student-driven research initiatives.
- Secured 1st Prize in the college Art Exhibition (2022), selected from 50+ participants for exceptional illustration and creative design.
- Secured 1st Prize in the “Stranger Code” programming competition, outperforming 100+ student competitors.
- Active NSS (National Service Scheme) volunteer engaged in community development and social outreach activities.
