

AI and Machine Learning professional with strong skills in Python, Deep Learning, NLP, and Computer Vision. I have a solid understanding of Statistics, Data Analysis, and the complete ML lifecycle—from data preprocessing to model evaluation. I have worked on building different types of ML models, GenAI applications, and Agentic AI workflows using LLMs. I also have knowledge of MLOps practices such as model deployment, versioning, and monitoring. I am passionate about creating practical, scalable, and user-focused AI systems that solve real-world problems and deliver meaningful impact.

SKILLS

Languages	Python, SQL
Frameworks & Libraries	PyTorch, TensorFlow, Keras, Hugging Face Transformers, Scikit-learn, Pandas, NumPy, OpenCV
Tools	Git, Jupyter Notebook, Docker, Model-serving frameworks (FastAPI), Linux, VS Code
AI Domains	Deep Learning, NLP, LLMs, Generative AI, Agentic AI, Transformer Models

PROJECTS

AI Recipe Creator (LLM-based Generation) <i>Tech Stack: Python, Flask, Google Gemini AI, RAG, JavaScript, Render</i> - Engineered a full-stack application using Gemini AI and RAG to generate recipes from user-uploaded ingredient images. - Reduced irrelevant recipe suggestions by 30% via multimodal analysis and constraint-based generation prompts. - Optimized inference pipeline, achieving a generation latency of < 500ms per query, and deployed on Render.	Nov 2025
Agentic AI Workflow Automation <i>Tech Stack: Python, LangChain, LLMs, FastAPI, Tool-Integration Frameworks</i> - Developed a multi-step agentic workflow that automated 5–7 task sequences, increasing task completion efficiency by 40%. - Integrated 6+ external tools (search, document parsing, file operations, code execution) into structured LLM pipelines. - Deployed the agent via FastAPI, enabling real-time automation and reducing manual research workload by 60%.	Feb 2025
NLP Pipeline for Sentiment and Intent Classification <i>Tech Stack: TensorFlow, Keras, Scikit-learn, NLTK, Python</i> - Processed and cleaned a dataset of 50,000+ text samples to build an end-to-end NLP pipeline. - Improved model accuracy from 78% to 91% using LSTM/GRU architectures and transformer embeddings. - Reduced training time by 25% through efficient batching, early stopping, and optimized preprocessing.	June 2024

EDUCATION

Bachelor of Technology in Artificial Intelligence & Machine Learning , R. C. Patel Institute of Technology, Shirpur	July 2025
Higher Secondary Certificate (HSC) – Science , D. R. Junior College, Shirpur <i>Percentage: 83.83%</i>	June 2021
Secondary School Certificate (SSC) , S. H. G. S. High School, Shirpur <i>Percentage: 81.81%</i>	June 2019

CERTIFICATIONS

Full Stack Data Science & Generative AI with Agentic AI , Naresh IT, Hyderabad	Present
Machine Learning Engineer Training (2 Months) , Symbiosis Skills & Professional University, Pune	Aug 2024
AWS Academy Graduate Certificate – Cloud Foundations , AWS Academy	Aug 2023

PUBLICATIONS

Breast Cancer Detection using Machine Learning and Deep Learning Models , <i>International Journal of Creative Research Thoughts (IJCRT)</i> <i>Research paper published focusing on ML & DL-based breast cancer diagnosis.</i>	May 2025

ACTIVITIES

- Technical Team Member at the Fetch.ai Club, contributing to AI/ML workshops and student-driven research initiatives. - Winner of the college Art Exhibition (2022) for outstanding illustration and creative design. - Winner of the “Stranger Code” programming competition at college. - Active NSS (National Service Scheme) member involved in community development and volunteer activities.
